The characters “’”, “''”, “'''”, “_”, “_” and (diacritical mark)“_” following a fractional separator or digit group separator shift them by 1, 2, 3, 4, and 8 places.

Revised from <https://en.wikipedia.org/wiki/-yllion> . “@”is the alias of the octal fractional separator ∴. The accent diacritical mark “˘” may be omitted in writing.
